Red Light Therapy Belt User Manual

Thank you for purchasing our products, please read the manual before use.

About the red light therapy belt

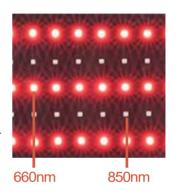

The red light device uses a combination of red 660nm and infrared 850nm leds that provides the ideal wavelengths found in the scientific research during last three decades. In this red light therapy belt, there are 63pcs 660nm leds and 42pcs 850nm leds.

660nm of red light

This light can be seen by eyes and targets skin cels.

850nm of near infrared light

This light cannot be seen by eyes and targets deep tissue.

Benefits backed by science

Research shows that the wavelengths in the spectrum of 660-900nm show optimal biological responses.

- Muscle and Joint pain
- Speed wound healing
